The watt rating is the total estimated alternating current (AC) energy output of the solar system. The total DC energy output is not used.	
The solar PV inspection fees shall include inverters, modules, panels, combiners, converters, charge controllers, disconnecting means and electrical conductors between the inverter and the ac panelboard for stand-alone solar PV systems, or the conductors between the inverter and the service equipment or other power production, distribution and utilization system, such as a utility system and its connected loads, that is external to and not controlled by the solar PV power system	
In addition to the basic solar PV inspection fees, additional inspection fees may be applicable on large-scale projects for the inspection of additional electrical infrastructure between the inverter output circuit and the electrical production and distribution network. The inspection fees shall be calculated according to Minnesota Statute 326B.37, Subdivisions 2, 3, 4, and 6, paragraphs (d), (f), (j), and (k)	

When a plan review is required or performed, the plan review fee is \$80 per hour.

***Fees are doubled if the work starts before the permit is issued**
